Exceeding expectations

We are one of largest sawn timber producer in Novgorod region of Russian's North–West. Our sawn timber production process results in close to zero Co2 emissions. We make and sell high–quality sawn timber from Nordic wood raw material. Our product portfolio includes spruce sawn timber and pine sawn timber.

Our sawn timber is used in wood products that are present in people's everyday lives very concretely. Our products are well–suited for challenging product solutions and our customers rely on these premium products in a range of industries and applications.

SAWN TIMBER PRODUCTS

Our premium sawn timber is used, for example, in housing and carpentry, the furniture industry, the construction industry, and in packaging. Our efficient production lines produce high–quality, smooth and even sawn surfaces, with precise dimensions and excellent drying results.

SERVING CUSTOMERS SUSTAINABLY

We are committed to sustainability and being a frontrunner in resource efficiency. We work with you to ensure that the sawn timber we deliver has the properties your end products require. This includes ensuring the appropriate moisture content, weather resistance and aesthetic qualities, as well as excellent dimensional stability and stiffness.

Our spruce sawn timber is particularly well–suited for interior and exterior paneling, furniture, construction, woodworking products, glulam production and concrete casting moulds.

The key properties of our spruce sawn timber are:
- an even color from the heartwood to the sapwood
- a densely grained structure
- a sound knotted appearance

Building the future with sawn timber product

On two production sites, which are located in the regional center in the North–West of Russia and occupy an area of 5 hectares, we make first–class products from the northern wood.
3700 sqm – the total area of workshops.
Modern German and Russian equipment allows us to produce products of stable quality and geometry.
